

Student iPad Use at WCA - Expectations

The following expectations relate to student iPad use at WCA, and are meant to be supplemental to the signed WCA Technology User Agreement. Violation of the following expectations will result in disciplinary action.

iPad use at WCA is a privilege, not a right.

All iPad use during the school day is for educational purposes only. Only school approved educational apps may be opened while on campus.

No student iPad may be used on the WCA campus unless the device has the Cisco/Meraki Mobile Device Management software installed. The Cisco/Meraki System Manager icon must be located on the left side of the fixed selection bar at the bottom of the iPad's screen for routine inspection.

All classroom iPad use is at the discretion of the classroom teacher.

iPads may only be used for class-specific educational purposes, for example, students should not be typing English homework during History class, doodling, surfing the web, or doing any other iPad activity not directly related to the class they are participating in.

Students may make audio recording of teacher lectures, but only after receiving specific permission from that teacher or staff member. Video recordings are only permitted as part of a specific teacher-directed assignment. The digital sharing of any audio or video recording made at WCA is permitted only after receiving written permission from the administrator.

iPads are "personal" devices, students may not loan their iPad, or share the content of their iPad, with any other student while on campus. All student iPads must be passcode locked while on campus.

iPads are not to distract other students in class, therefore they should lay flat on desks.

iPads are not to be recharged on campus. Students can lower the brightness of their devices to conserve energy during the school day.

iPads are not permitted in bathrooms or changing rooms.

Headphones and earbuds may not be used outside of a teacher-directed school project.

Student iPads with cellular data plans must have cellular access turned off prior to arriving on the WCA campus. "Settings ... "Cellular Data" ... "Off"

The "Air Play" or "Air Drop" feature of iPads may only be activated at the request of a teacher.

Students may not adjust any settings or configurations on school-owned iPads.

Inappropriate content found on an iPad will result in disciplinary procedures. WCA reserves the right to determine what "inappropriate content" is.

Students should have no expectation of privacy as it relates to content on their iPad; if the administration suspects non-compliant use, a student may be asked to open files and applications on their iPad in the presence of administrative personnel.

It is the school's intent to diligently and rigidly enforce the expectations listed on this page.
